

21 Connect

Use a pencil to draw a pathway between any pair of cards that total 21. Do the same for the other 2 pairs of cards. None of the pathways can cross over each other or go outside the rectangle.

A rectangular grid for a 21 Connect puzzle. The grid contains six numbered cards: 13 (top center), 12 (left side), 18 (left side), 9 (right side), 3 (right side), and 8 (bottom center). The text "21 Connect" is written in the top-left corner of the grid.

21 Connect

Use a pencil to draw a pathway between any pair of cards that total 21. Do the same for the other 2 pairs of cards. None of the pathways can cross over each other or go outside the rectangle.

A rectangular grid for a 21 Connect puzzle, identical to the first one. It contains six numbered cards: 13 (top center), 12 (left side), 18 (left side), 9 (right side), 3 (right side), and 8 (bottom center). The text "21 Connect" is written in the top-left corner of the grid.
