

Arrow to Rectangle Puzzle

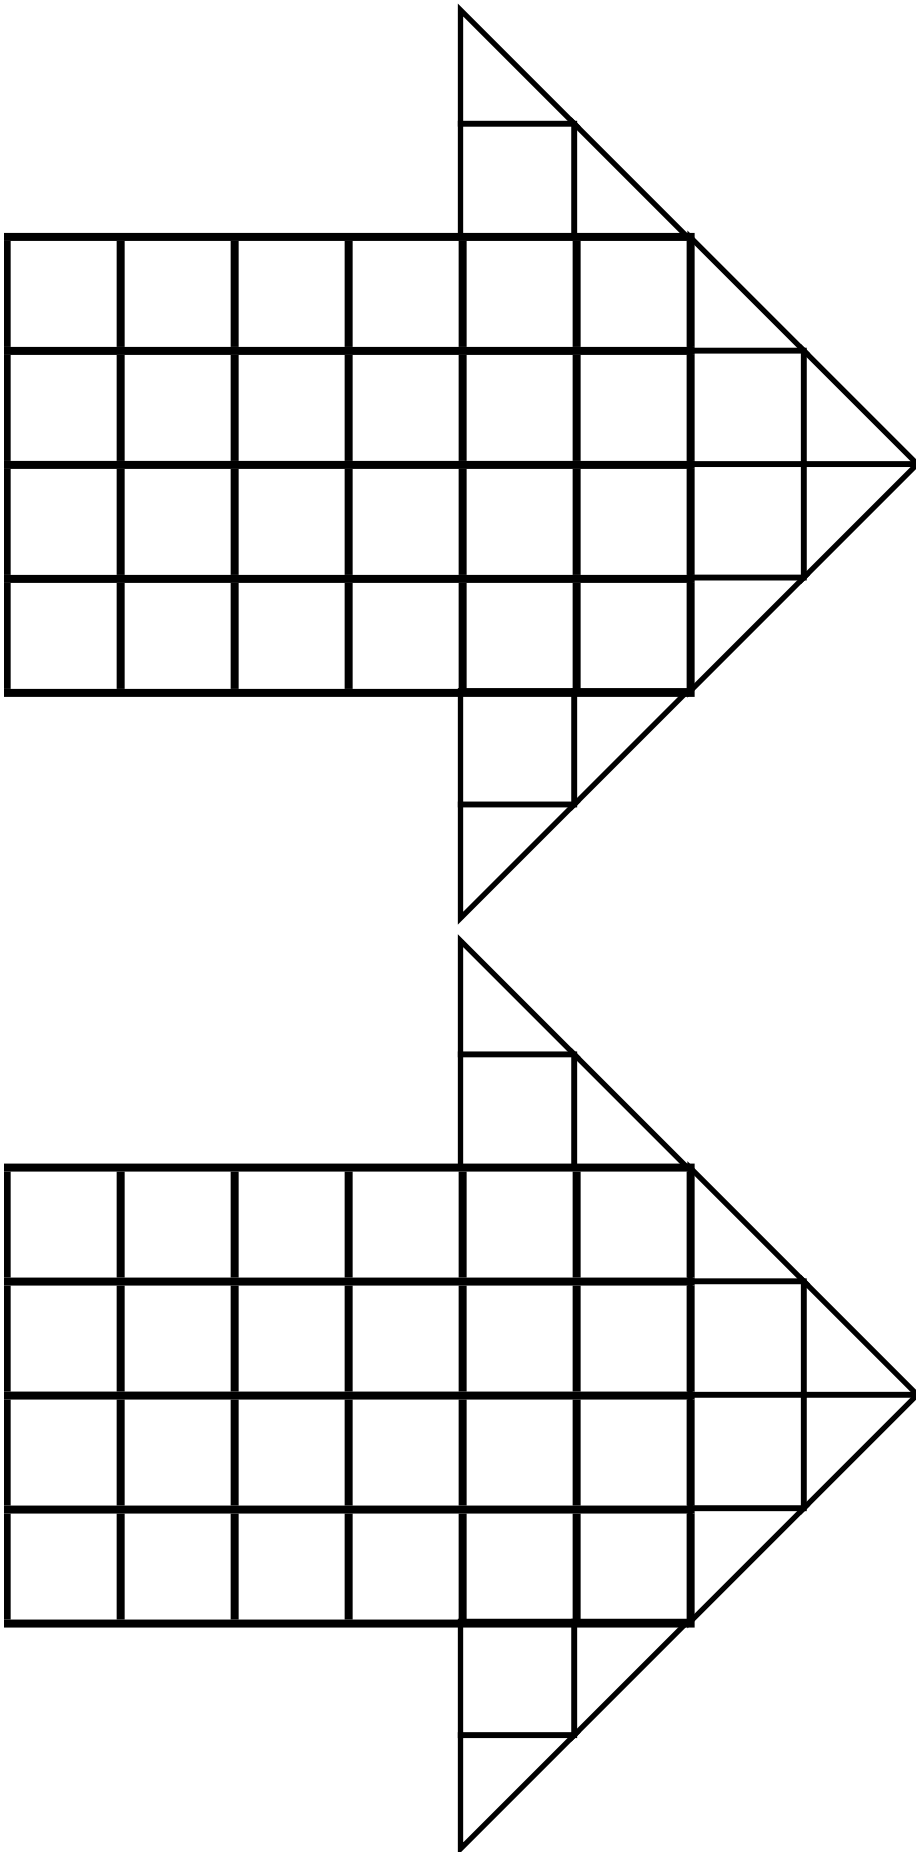

Cut the arrow below into three pieces so that you can arrange the 3 pieces to completely cover the rectangle at the bottom of the page. The cuts must go through the lines of the grid on the arrow. The 3 pieces can be rotated and/or flipped over. 4 extra arrows are provided to use if you need to rest your ideas. There are 2 different solutions.

Use these extra arrows
to draw possible lines
to cut along and
then cut the 3 pieces
out and test to see if they
cover the rectangle exactly.

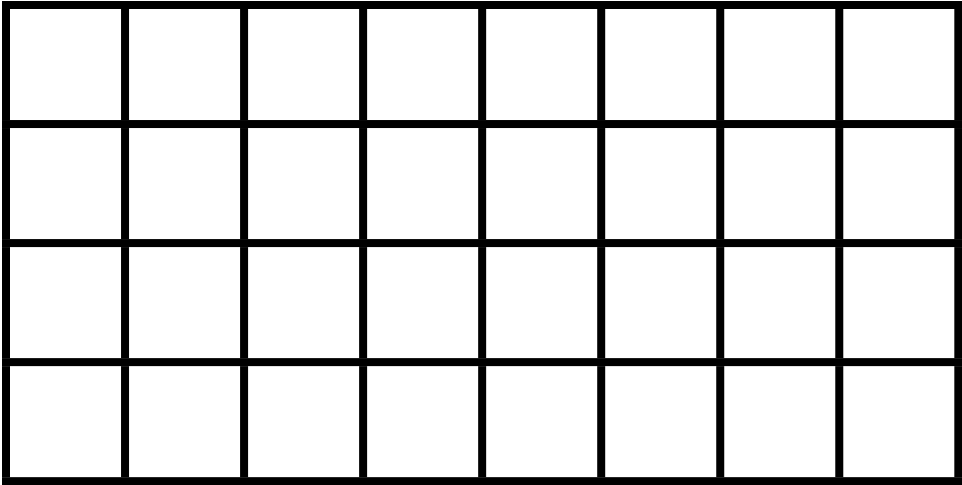

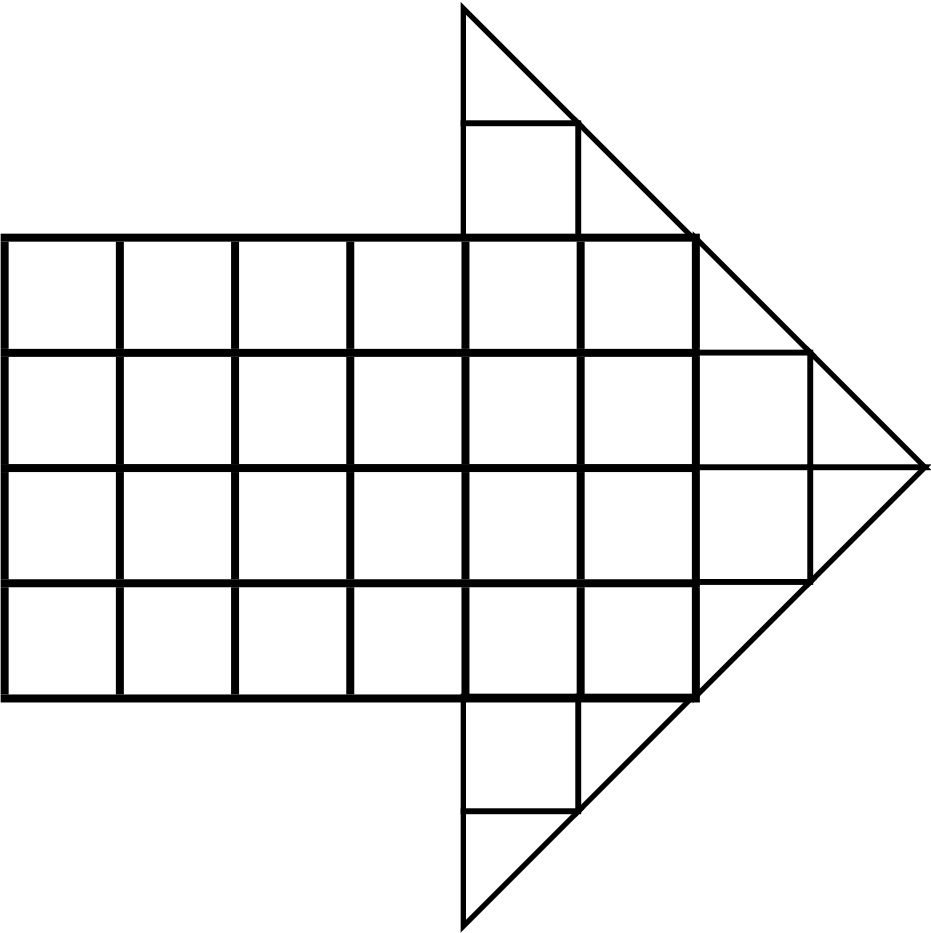

Use these extra arrows
to draw possible lines
to cut along and
