

Number Names

Most magic tricks with math ask you to add subtract multiple or divide.

Here is a great spelling trick using numbers.

Step 1. Pick a number from 1 to 100 (larger will work)

Step 2. **Spell** out the number. 10 is ten. This is great spelling practice...

Step 3. Count the **number of letters** in the name to get a second number.

Step 4. Spell out the second number.

Step 5. Count the **number of letters** in the second numbers name to get another number.

Step 6. Continue this until the chain of numbers keeps repeating.

Example

1. 16
2. Sixteen
3. 7
4. seven
5. 5
6. five
7. 4
8. four
9. 4

The repeat is 4

Example

- 523 five hundred twenty three
22 twenty two
9 nine
4 four
4 four

Example

1. 21
2. twenty one
3. 9
4. nine
5. 4
6. four
7. 4
8. four
9. 4

The repeat is 4

Example

- 2021 two thousand twenty one
19 nineteen
8 eight
5 five
4 four
4 four

Example

1. 61
2. sixty one
3. 8
4. eight
5. 5
6. five
7. 4
8. four
9. 4

The repeat is 4
